### EDUCATION

#### Self-Taught Developer

2021 – present

Actively learning through real-world projects, online resources, and documentation-first development.

### PROFESSIONAL EXPERIENCE

#### Freelance

Frontend Developer

01/2023 – present | Remote

- Built and deployed 10+ responsive, high-performance web apps using React.js, Next.js, and TypeScript.
- Delivered polished UIs with intuitive interactions and clean animations using Framer Motion and Tailwind CSS.
- Developed reusable React components across multiple projects, reducing development time by up to 30%.
- Achieved Lighthouse scores of 95–100% by enhancing performance, accessibility, and SEO.

#### Fluentwave

Full Stack Developer

11/2024 – present | Remote

- Led frontend for a full-stack language app with React.js, Next.js, and TypeScript.
- Enhanced UI load speed by 40% across mobile and desktop through optimized components.
- Implemented gamification logic, boosting engagement by 35%.
- Collaborated with designers to develop an accessible, consistent cross-platform design system.

### LANGUAGES

English

Swedish

### PROJECTS

#### DevDash — Developer Productivity Dashboard [🔗](#)

React.js, Tailwind CSS, Firebase, GitHub API

- Built a full-stack productivity dashboard with GitHub integrations, Productivity Timer, and daily dev quotes.
- Implemented user authentication, session tracking, and dark mode.

#### Space Tourism Website [🔗](#)

React.js, Tailwind CSS, Netlify

- Developed a modern, animated multi-page UI with full mobile responsiveness.
- Reduced page load time by 50% using code splitting, lazy loading, and asset optimization.
